

Assignment - 9

require 'mail'

Set up SMTP settings

Mail.defaults do

```
  delivery_method :smtp, {  
    address: 'smtp.gmail.com',  
    port: 587,  
    user_name: 'rupesh.anywhere@gmail.com',  
    password: '**** *', // use app password here  
    authentication: :login,  
    enable_starttls_auto: true  
  }  
end
```

Define email message

message = Mail.new do

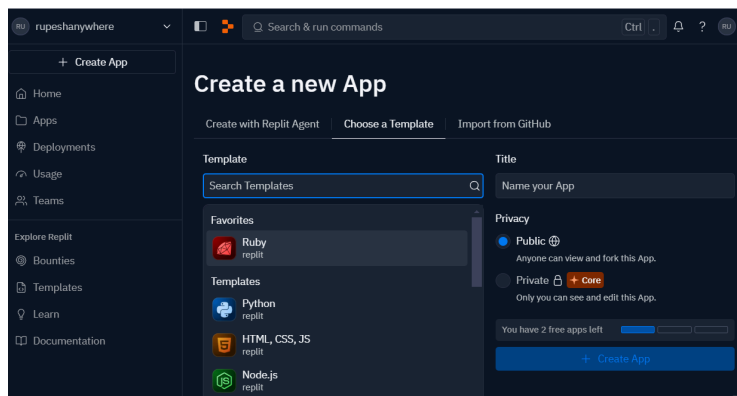

```
  from 'rupesh.anywhere@gmail.com'  
  to 'rupesh.poudel22@pccoepune.org'  
  subject 'Hello from Ruby!'  
  body 'This is a test email sent from Ruby.'  
end
```

Send email

message.deliver!
